

Candle Care

- ❖ To prevent tunnelling (on 3inch and 4inch width candles), and burn down evenly - ensure you always light your candle for 4hrs or more, ensuring the pool melts to the edge of the candle
- ❖ Keep Scented and coloured candles away from direct sunlight or will lose scent and colour
- ❖ Keep candle wick trimmed to 4mm before each light to avoid smoking
- ❖ We recommend using extended lighter to light the wick
- ❖ To switch off candle, dip wick in wax pool, do not blow out
- ❖ Keep wax pool clean, free from wick trimmings and debris
- ❖ "When a non-drip candle is placed in a confined holder, the space around it contains more heat and it may leak."

SAFTY WARNING!

- Never leave a lit candle unattended
- Never place candle on wooden furniture, fabric, combustible or flammable base
- When using candle cup products, keep out of wind or draft, place in protective fireproof holder as cup may melt or flame
- Keep out of reach of children and pets
- Keep candles away from drafts or windy areas, unless in covered holder
- Never move a burning candle, ensure the wax is solid and cool before handling
- Never let your candle burn less than 10mm to the end
- Keep wax pool clean, free from wick trimmings and debris
- Remove all wrapping and unnecessary/obstruct-able decor that may be flammable
- It is the responsibility of each person handling any of our products to keep it safe and avoid any mishap
- Ensure a fire prevention unit/extinguisher is in close vicinity when handling a flammable item such as a candle/candles
